UNDER DECK OASIS

America's Most Trusted Under Deck Drainage System

HOW DOES UNDER DECK OASIS WORK?

Under Deck Oasis is similar to a dropped ceiling, made of water tight panels that drain water into a gutter system.

The interlocking panels are slightly slanted to one side to allow the water to move freely to the gutter.

The gutter then redistributes the water away from the deck and house, keeping your space dry and usable.

Accessories

LIGHTS & FANS

While performing your installation we are able to provide the necessary waterproofing for any lights or fans that you desire to have installed.

SWINGS & MORE

We are also able to hang hooks for porch swings or plants. We have waterproofed areas for speakers too! Have an idea? Let us know!

REAL CUSTOMER TESTIMONIALS

"I can't believe how EASY the process was. Thanks guys!" - **Rick Dolan**

"Just a note to say thanks. My under deck turned out great. We even had a few strong rain storms and NO LEAKS. Your product is far superior to any other underdeck system that I checked out."

- **Jim Salb**

"We are thrilled with the results! Under Deck Oasis is the only way to go!!" - **Sherri Dodson**

"I am very pleased that I chose the Under Deck Oasis product to complete the living space under my deck. The patio where we installed the Under Deck has an outdoor kitchen that was unusable when it rained. So it has made my patio so much more functional."

- **Brian Hedgren**

"It's one of the best things I've done to my house." - **Barbara Bellville**

"We are very happy with the product and the job you did on the installation. It looks very good and matches the house trim. It is really great to be able to grill and use my smoker completely out of the rain. Thanks for a great product and installation."

- **Bob Greenland**
